

Grow the Crop

Handout 28

Data Required For Broiler

Example of data required for a broiler

Example:

Budget for record keeping of three-week old broilers on a farm. In order to keep three-week old broilers, the farmers should know that he or she needs a grower house to keep chicken, a feed storeroom, enough water, and the knowledge and skills to look after the birds, how to feed them, how to recognize and guard against disease, and then for the purpose of this example, how to keep record of them and how to market them. The first step would be to plan the range of data needed to keep the broilers. Thus, the budget for home egg production by the broilers. This type of data or budget would perhaps look like this:

A	Data Collection Plan	
	for a home egg production for o	one year:
Expenses:		
Fixed costs:		
Cage:		
12 POL pullets	@ R/pullet (chicken)	R
Running Costs:		
Feed:bags layer mash	@ R/bag	R
Other Expenses		R
	Sub-Total:	R
Income:		
Eggs eaten by your household	(doz x R/doz)	R
Sales of eggs	(doz x R /doz)	R
Sale of old hens	(hens x R/hen)	R
	Sub-Total:	R
Surplus = Income - Exper	ISES	R
